THE FIELD MANUAL / 27 OCTOBER 2026

LEGACY WRITING ROOM.

How to document a life without turning it into a triumph myth.

This guide is an offline companion to the interactive Legacy Letter Studio. It contains an editorial method, a worked fictional example, a one-page reflection worksheet, historical cases, ethics checks, and further reading. It is not an assessment or therapeutic intervention.

The archive is breathing. A life is not a pitch deck.

01 / BEGIN WITH A RECORD

The life between the lines

Start smaller than a memoir

A legacy document is not obliged to prove that its author was extraordinary. A note about what a room smelled like, who maintained a household, or how a friendship changed can preserve forms of experience that public achievement records omit. Begin with something particular: an object you used, a recurring ritual, a journey with no milestone at the end. Abstract self-descriptions such as “resilient” and “driven” can be substituted by scenes; a reader can understand an act without accepting a slogan about character.

Five editorial distinctions

Observation names something directly witnessed or recorded. **Recollection** names what you remember and allows that memory to be incomplete. **Interpretation** names the meaning you presently assign. **Unknown** states what your sources cannot establish. **Boundary** states what you choose not to disclose and why. These are working editorial distinctions, not diagnostic classes. A single paragraph can include several, provided readers can tell which is which.

Why this helps

A polished story is capable of rearranging chance into destiny. When success eventually appears, the messy years begin to look like obvious preparation. Yet a different ending could have made the same choices seem reckless. Try reading your account without knowing the final outcome: would the choices still make sense? Did other people, institutions and luck contribute? Does your story allow for setbacks that were simply painful and did not improve anyone? You can honour agency without inventing inevitability.

The unglamorous archival move

Preserve drafts, dates, sources and the rules of access. A filename such as 2026-10-27-kitchen-memory-draft-01.txt is more useful than final-final-reallyfinal.txt. Keep at least two copies in different places if the record matters; record who made it and which later changes were editorial. If a work depends on other people’s testimony, ask them about consent and access. This is stewardship, not just self-expression.

02 / THE HONEST LETTER METHOD

A useful scaffold, not a verdict

Address a human-sized audience

A future version of yourself, a trusted person, an unknown reader and no reader at all produce different tones. State the audience for your letter. Do not assume private writing must become public. The right to set a boundary is part of a serious archive, not a failure of honesty.

Build the letter in five moves

1. Address. Write “Dear...” without promising a revelation. **2. Scene.** Describe one ordinary moment using objects, sounds or actions. **3. Difficulty.** Name a difficulty without asserting that it had to happen to make you stronger. **4. Credit.** Acknowledge someone’s contribution without borrowing their private life. **5. Unfinished ending.** Leave a question open, offer thanks, or return to an ordinary image. Remove any invented motives before sharing.

The four source registers

DOCUMENTED FACT: a claim supported by identifiable records; cite them. **INTERPRETATION**: present-day significance; label it as yours. **HYPOTHETICAL EXAMPLE**: a teaching scenario, not an event you claim happened. **FICTION**: explicitly invented material. These labels protect readers from confusing literary vividness with historical evidence. They do not make uncertainty disappear; they make uncertainty discussable.

A transparent exercise

The online studio takes your text and places it inside fixed, publicly inspectable sentence frames. It never scores your life, deduces personality traits, identifies motives or submits data to a server. On paper, you can use the same frames: “A scene I want to keep...”; “A difficulty that did not owe me a silver lining...”; “This story is not only mine because...”; “Something I still do not know...”. Those four headings are enough for a first version.

Revision does not require erasure

When you later disagree with your first draft, do not automatically overwrite it. Date a second version and add a small editorial note: what new information emerged, what changed in your interpretation, and what remains in dispute. This makes the evolution of the record visible rather than pretending that your present understanding was always there.

03 / CASE NOTES

Revision, testimony, persona

Case one: Anne Frank and the published diary

DOCUMENTED FACT. The Anne Frank House explains that Anne revised substantial portions of her diary in 1944 while considering publication. Her father Otto later compiled a published text from original and revised material, issued in 1947. The diary therefore has a documented history of authorial editing and later publication decisions. **INTERPRETATION.** The case shows that a diary is not necessarily a transparent stream of unedited interiority. It must not be repurposed as a cheerful personal-branding parable: it is testimony from a Jewish teenager hiding during the Holocaust. The context and stakes are inseparable from the record.

Anne Frank House sources: https://www.annefrank.org/en/anne-frank/diary/two-versions-annes-diary/ and https://www.annefrank.org/en/anne-frank/diary/publication-diary/

Case two: Frederick Douglass and testimony

DOCUMENTED FACT. The Library of Congress holds a digitised record of the 1845 Narrative of the Life of Frederick Douglass, an American Slave, published by the Anti-Slavery Office in Boston. **INTERPRETATION.** An autobiography used in a struggle against enslavement belongs to a different rhetorical, evidentiary and historical setting than a private letter. Asking “for whom was this written?” is part of reading responsibly. The contrast reminds us not to detach suffering from systems and communities just to manufacture an inspirational arc.

Case three: David Bowie and the performed self

DOCUMENTED FACT. The Victoria and Albert Museum discusses Bowie’s Ziggy Stardust and Thin White Duke stage personae. **INTERPRETATION.** A performed character can intensify style without becoming a literal diary. For memoir, the relevant question is which voice is speaking: public persona, remembered self or present-day editor. This also matters when studying hip-hop alter egos, but one performer’s artistic role does not establish the private motives of another.

04 / EXERCISE & WORKED EXAMPLE

An unheroic letter in four moves

FICTION / INVENTED EXAMPLE: The details below refer to no real individual. They model a method, not a fact claim or quotation.

Step A — Capture a scene

Prompt: Name an unremarkable location, object and action. **Sample:** “At six, a table lamp flickered while two cups dried beside the sink.” This records texture without telling readers what emotional conclusion they must reach.

Step B — Resist retroactive purpose

Prompt: Name a difficulty, but refuse to make it necessary. **Sample:** “A promising plan fell through that month. I did not gain secret wisdom on schedule.” This is compatible with later learning; it does not claim the disappointment caused whatever came next.

Step C — Acknowledge someone else

Prompt: Credit an act of support without claiming access to the person’s reasons. **Sample:** “My neighbour left soup at the door. I was grateful; I cannot know what that day felt like to them.” A human participant remains a person, not a plot device.

Step D — Leave the ending open

Prompt: Ask one question whose answer need not appear today. **Sample:** “I still cannot say whether we chose the right city. For now, the cups are dry.” This is an ending with form, not false finality.

Try it on paper. Start with these exact four headings: **SCENE** / **DIFFICULTY WITHOUT A SILVER LINING** / **OTHER PEOPLE** / **WHAT REMAINS UNKNOWN**. Draft 100-200 words; revise for evidence, consent and the difference between feeling and fact.

05 / ETHICS & PRESERVATION

An archive is a responsibility

People are not supporting characters

A writer may accurately report feeling excluded without possessing evidence about another person’s intention. “I felt excluded” and “she wanted to humiliate me” are not interchangeable claims. When a living person could be identified, ask whether the detail is necessary, whether it exposes sensitive information, whether the individual has consented and whether publication could cause foreseeable harm. Pseudonyms alone do not guarantee anonymity. Ethical limits may justify keeping a record private.

What a source note can look like

Documented trace: email sent 4 March, retained in its original format. **Recollection:** I remember reading it on a rainy evening, but cannot verify the weather. **Interpretation:** It felt like a turning point to me at the time. **Unknown:** I do not know how the sender interpreted the exchange. **Boundary:** I will not publish the sender’s identifying details without discussion. Each line tells a future reader what sort of claim they are receiving.

Keep the material, not just the meaning

Retain original files where possible, select stable common formats, write meaningful filenames, note the provenance and location of recordings, and keep more than one safe copy. If other people contributed interviews, explain how recordings may be accessed and who can use them. Review those conditions when circumstances change. Check digital backups occasionally rather than trusting that a link will work forever.

An ethics check before any release

Read the letter aloud. Does a dramatic adjective imply a fact you cannot substantiate? Did you compress years into a simple cause-and-effect story? Does another person appear only when they helped or hurt you? Is there private information a reader does not need? Would a clear qualifier improve accuracy? Could you keep two versions, one private and one prepared for sharing? These are questions, not a mechanical ethics certification.

06 / ONE-PAGE REFLECTION WORKSHEET

A small record of a life

Date: _____ Audience: _____ Private / shareable (circle one)

1. ONE ORDINARY SCENE

Where were you? What object, sound, scent or action can you describe without interpretation?

_ _

_ _

2. A DIFFICULTY WITHOUT A VICTORY SPEECH

What happened that was hard? What would you say if you did not owe readers a redemptive ending?

_ _

_ _

3. SOMEONE ELSE IN THE ROOM

Whose care, labour, disagreement or presence matters? Which details require privacy or consent?

_ _

_ _

4. AN UNCERTAINTY WORTH KEEPING

What cannot be verified, or what are you still changing your mind about?

_ _

_ _

5. THE FINAL SENTENCE (NOT THE FINAL ANSWER)

Close on an ordinary detail, an honest question or unembellished thanks.

_ _

_ _

SOURCE LABELS: DOCUMENTED FACT / INTERPRETATION / HYPOTHETICAL EXAMPLE / FICTION

Before sharing: check dates, identify interpretations, consider consent, remove unnecessary personal details, preserve the private original.
